and telling about OXYPATHY. Read this astounding revelation of the insincerity and incompetence of commercialized medical practice with its deadly poisoning method for the treatment of disease.

Post yourself on the sham and the shame of the Drugging System—the slow poisoning of the helpless invalids, suffering women and innocent children—the criminal performance of needless "operations." This book will wake you—will set you thinking—will show you that in many things we are guided by habit and tradition rather than by reason.

Why do you run to "Dr. Dopem" for every little ailment—every little scare in the family? Why do you credit him with more intelligence than yourself?

Why allow anyone to feed you and your children vile concoctions and poisonous drugs that you would not knowingly give to a dog? Or why submit to being mutilated by "Dr. Cutem" without an intelligent effort to prevent it?

The reason is, perhaps, that people are ignorant of some facts of which they should know. But our free book leaves no excuse for this lack of knowledge.

Come out of it, you long suffering people! Strike off the shackles of your servile slavery to the dosing system! Take on the armor of real, red-blooded health!
